Life-Cycle Support Program

IST creates comprehensive solutions for your most complex and important IT and electronic, physical and cyber security challenges. We help you do it all — design, integrate, install and maintain your IT systems.

With **S.H.I.E.L.D.**, our full life-cycle management program, businesses can stretch security budgets and improve security outcomes by outsourcing aspects of their security system including infrastructure, specialized staff and ongoing maintenance through our multi-tiered service and support programs. This customized approach makes sure you always have the support you need, without any excess programs or costs you don't.

# SHIELD
